*Other Top Astron Products:*

## **ultraflex PARTIALS**

ULTRAflex is a Flexible Partial Composite material which offers the Ease of Processing and Repairability.

This non-methylmethacrylate composite can be processed with either conventional press-packing or pouring techniques. ULTRAflex can be easily repaired or relined and cures quickly to speed up laboratory time. ULTRAflex will provide your patients with years of **problem free** partials with comfort. Available in both clear and pink.

## **1180 vinyl DENTURES**

Astron 1180 dentures possess the properties of pure vinyl which offers the toughness and resiliency not possible in acrylic dentures. **COMPLETELY NON-ALLERGENIC!**

Astron 1180 dentures **maintain their fit** and dimensions because they are formulated with a vinyl resin that has less porosity and a lower water and alcohol absorption rate. The Astron 1180 denture is the **ONLY** denture that may be **left out of water** without warpage.
