## NEW PRODUCT ANNOUNCEMENT

 Denpress®

*All-in-one Dispensing Gun*

The Denpress® takes all of the advantages of existing IMDS technology and combines them into one elegant, easy-to-use unit.

### Tangible, Measurable Benefits

- The Denpress® eliminates the clutter and confusion from the dental impression-making process by accepting all types of 50ml mixture cartridges, regardless of mix ratio.
- The unit is designed to fit hands of all sizes and strengths, making it easy for anyone to use. The handle and trigger mechanism provide high thrust and comfortable control even with high-viscosity materials.
- The Denpress® is made of strong, lightweight material that withstands repeated steam sterilization.

### Cartridges, Mixers, and Intra-Oral Tips

- *The cartridge-to-mixer connection in the Denpress® unit has separate outlet ports, keeping resin and activator materials separate until they meet in the mixer nozzle. This avoids cross-contamination and prevents cured material from accumulating in the cartridge outlet.*
- Color-coded mixers and caps make material identification easier and reduce the risk of errors in adhesive selection and mix ratio.
- Cartridge caps fit the Denpress® in one orientation only, preventing contamination when resealing.

#### Ordering Information:

Item No. 01280 BDM Denpress Dispensing Gun

**THE LAST  
DISPENSING GUN  
YOU'LL NEED**
