

# Do you Cure?

## Its time to start curing your cases with iCure

The iCure is the perfect addition to any Dental office, Denture clinic or commercial Dental Laboratory. It rapidly cures all light cured custom tray, Temporary material, baseplate material and block out materials in mere minutes without distortion, heat or unhealthy vapours. A highly accurate touch pad digital timer allows you to set the precise curing time required to make the best use of time and materials. A small footprint means that it takes up next to no space - but still has the capacity for processing multiple cases in one cycle.
